Student Research Poster Competition Important Information

The primary objective of the Northern Ontario Ag Conference is to disseminate agricultural research relevant to Northern Ontario producers. Hosting the Student Research Poster provides a valuable platform for students to showcase their innovative research in agriculture, engage with professionals and producers, and contribute to the agricultural community in Northern Ontario. We encourage all eligible students to participate and share their findings in a clear, concise, and visually appealing manner.

Eligibility

The contest is open to current students enrolled in undergraduate, graduate, and masters students conducting research relevant to agriculture, particularly within the context of Northern Ontario. Participants must be affiliated with an accredited academic institution.
